Möjligheter för regenerativt jordbruk

- Regenerativt jordbruk verkar vara bra för biologisk mångfald (Latawiec, A.E., 2016
<https://doi.org/10.1111/btp.12386>)
- Regenerativt jordbruk tillämpas i ull- och bomullsproduktion, om än i liten omfattning, oklart om viskosproduktion.
- Syntetfibrer dominerande textila fibern (~65%) (Textile Exchange, 2020)
